

From gummy smile  
to toothy grin

### NICOLE KIDMAN, 50

The *Big Little Lies* star made some big upgrades to her smile, including veneers for improved color and shape, suspects Dr. Matt Nejad of Helm Nejad Stanley Dentistry in Beverly Hills.

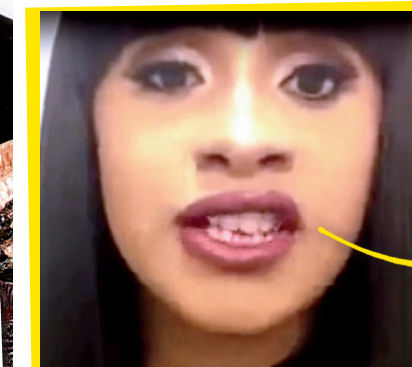

### MADONNA, 59

Get into the groove...just don't get rid of the gap! "Madonna's gap provides character that she clearly does not want to lose," says Beverly Hills dentist Dr. Anjali Rajpal, who thinks the singer used veneers to improve her look without fully closing her trademark gap.

### MORGAN FREEMAN, 80

Dr. Nejad thinks the iconic actor has had a "full mouth reconstruction costing between \$60K and \$100K," and Dr. Rajpal sees evidence of porcelain crowns and Invisalign.

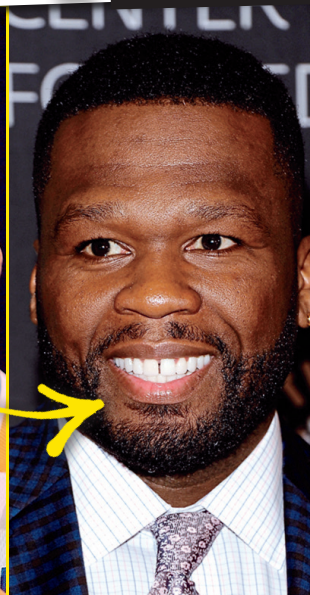

### CARDI B, 25

As the outspoken rapper spits in her hit song "Bodak Yellow": "Fixed my teeth / Hope you hoes know it ain't cheap." She corrected an underbite and extreme asymmetry, and the result, says Dr. Nejad, is "much more confident and flattering."

# They Fixed Their Teeth!

Chew on this! Whiter, straighter chompers have given these celebs reason to smile

### 50 CENT, 42

We all know Fiddy loves to smile, so it makes sense that the rapper would get his choppers in tip-top shape. "They're definitely whiter and easier on the eyes now. But, like Madonna," Dr. Rajpal notes, "he's attached to the gap in his front teeth."

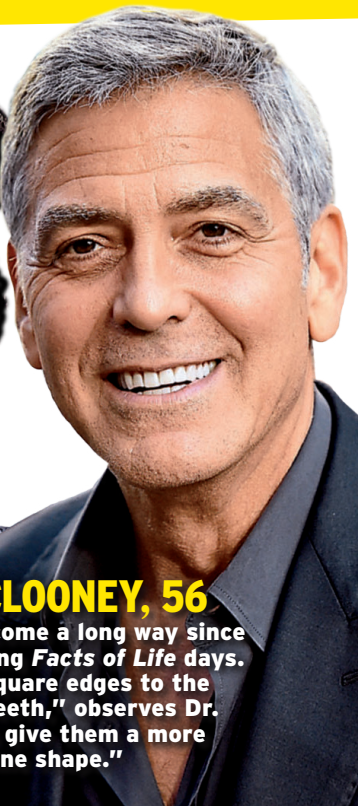

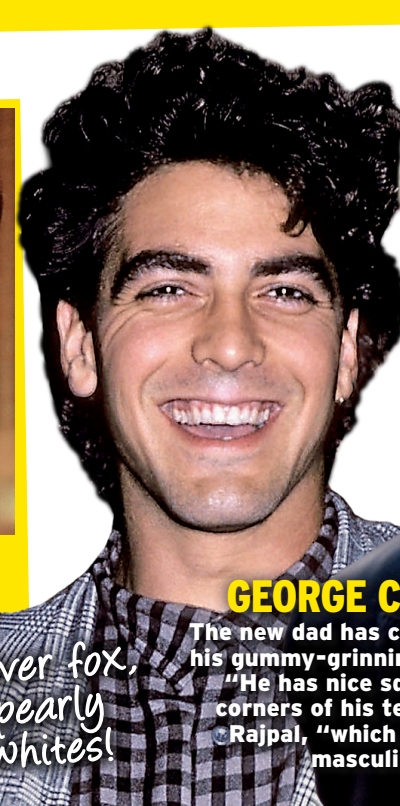

### AVRIL LAVIGNE, 33

There's nothing all that "Complicated" about what the rocker has done with her famously misaligned teeth. "I believe she had either orthodontics [like Invisalign] or veneers," says Dr. Nejad. "Every tooth is positioned differently and her new smile is much broader."

### NICOLAS CAGE, 53

He once had the mouth of a hockey player, but the Oscar winner had his missing tooth replaced and improved the size and shape of the rest. "They look much better," says Dr. Nejad, "but his right-side canine is still a little bulgy."

### GEORGE CLOONEY, 56

The new dad has come a long way since his gummy-grinning *Facts of Life* days. "He has nice square edges to the corners of his teeth," observes Dr. Rajpal, "which give them a more masculine shape."
